#### “Adopted Villages under UBA”

Nadar Saraswathi College of Arts & Science, Theni in hands with MHRD under the Scheme of Unnat Bharat Abhiyan adopted Five villages:

1. Ammapatti
2. Alagapuri
3. Alagarnayakanpatti
4. Gullapuram
5. D.Vadipatti

A group of faculty members visited the villages to conduct Village Survey and household survey on 11-03-2019. Village council president provided the data about village and after which household survey was collected from individual houses. They had arranged 2 volunteers to go along with faculties in order to communicate with local people effectively and on these days survey were taken from 100 households. The faculty members involved 25 Students for each village as Volunteers.

Ammapatti, This village as well as neighboring villages have network connectivity issues due to which the residents are unable to access online services and are inaccessible to various digital platforms. No Proper government Schemes has reached the people of this village. Most area of the village is covered by forest. The village faces water crises during the summer season, due to poor water management. Better water harvesting techniques may help to solve this water crisis.

Alagapuri, the health care facilities for this village are improper. They don't have proper sanitation in their area since they are using open defecation. They don't have any renewable sources of energy using Comport Pits. The transport facility is not proper; it is available only two times a day. The mobile network connectivity is very poor due to which communication issues are of main concern. The farmers are using harmful pesticides in their farm, which is to be replaced by Natural manures.

Alagarnayakanpatti is having Government Primary School and a computer PC. Farmers need proper guidance regarding cultivation of their own agricultural land. People are interested about sustainable source of energy. There is a dire need of water harvesting in the village. The income of this Village people is low. So, in order to raise the income we should encourage the women to become an entrepreneur.

Gullapuram Village has Primary School. The business sector has opportunity to grow but due to inconsistency in network and proper digital resource it has been facing major setbacks. The Higher Primary School has some technological devices such as computer PCs but not

projectors. Overall development in Schools may boost the learning community of the village. Farmers need proper guidance regarding cultivation of their own agricultural land.

D.Vadipatti Village have considerable amount of population taking into account the limited area there is scope of implementing various real time projects. The Primary School have computer PCs but due to unavailability of internet service they cannot use its resources to fullest. This school is ideal for conducting activities for students and Digital School may boost the way of learning. Farmers need proper guidance regarding cultivation of their own agricultural land. This village can have more Self-help groups for women.

#### REPORT

#### “UBA Activity”

Nadar Saraswathi College of Arts & Science, Theni in hands with MHRD under the Scheme of Unnat Bharat Abhiyan adopted five villages, in that we made our first activity towards the School Students, where they are the future of our nation. To do this activity, we have chosen three villages as follows:

1. Alagapuri
2. D. Vadipatti
3. Gullapuram

We have collected the information about student's and the teacher's need in the education part and we started training them from 17.07.2019 to 30.09.2019.

Alagapuri, is a rural area. It is having a Government Middle School where the students are poor in English and hesitate to communicate in English. We targeted on training them to communicate in English without any hesitation. So, we taught them the Basic English such as tenses, parts of speech and how to the converse with the various people like friends, teachers and the Officials. As a result, the students got trained.

D. Vadipatti is a Village. It is having a Government Middle School, in which they are good at Communication but they are not good in basics of computer. We targeted on training them related to computers basic. This helps them to improve the knowledge on computer. We teach them how to prepare and use Word documents. We also tested them by giving some task according to their standards such as VI-VIII.

Gullapuram Village has Primary School in that rural area school students are poor in English. We planned them to communicate in English without any hesitation in them. As a result the students got trained. We gave the topic to spoke in English and questions provided to them related to tense, parts of speech.

Also accompanying this activity, we have also created an Awareness program on “Rainwater harvesting” which helped the Students to learn about the importance of Water Saving.

We are happy in teaching them because they are also eager in learning from us. At last they get learned what they need and we trained them in different way that they can understand.

The dates and the Portions handled are listed below:

<b>S.NO</b>	<b>DATE</b>	<b>DAY</b>	<b>PORTIONS COVERED</b>
1.	17.07.2019	D.Vadipatti	Self-Introduction, Basic of Computers
2.	17.07.2019	Gullapuram	Introduction to Spoken English, Self Introduction
3.	24.07.2019	D.Vadipatti	Introduction to MS Word., How to Create , Open and Save a Document Awareness on Rainwater harvesting
